

Quantum Smart Mug Pro - User Manual

1. Introduction

Welcome to the future of beverage containment. The Quantum Smart Mug Pro is engineered to maintain your drinks at the exact atomic temperature you desire. Equipped with a micro-fusion heating element and Bluetooth 6.0, this mug ensures your coffee never goes cold.

2. Technical Specifications

- Battery Capacity: 10,000 mAh internal lithium-ion cell.
- Operating Temperature Range: 45°C to 85°C (113°F to 185°F).
- Charging Interface: Liquid-proof USB-C and 15W wireless magnetic base.
- Weight: 450 grams when completely empty.

3. Setup and Pairing

To connect your mug to your smartphone, hold down the power button on the bottom of the base for exactly 5 seconds until the LED indicator pulses blue. open the Quantum Brew App and select 'Scan for Devices'. The default pairing passcode is 0000.

4. Troubleshooting Guide

If your mug flashes a red light, it indicates a thermal overload. Turn off the device immediately and let it cool for 15 minutes. For connection issues, reset the network chip by pressing the power button 3 times rapidly.
